

FLY WIRE

A ZIPLINE RIDE

GET READY TO TAKE FLIGHT.

FASTEST CYCLE TIMES.

**AWARDED BEST MAJOR
THEME PARK RIDE.**

TOTALLY EXHILARATING.

ABOUT THE FLY WIRE™ ZIPLINE

The Fly Wire™ zipline has gained traction and notoriety as the only “Best Major Theme Park Ride” zipline – one of the highest industry honors – for its brilliant design and savvy configuration. A spiral staircase leads to a zipline tower, which allows two riders at the same time on two lines. This zipline configuration is the safest and fastest in the world, requiring no additional anchoring or attachments. The Fly Wire™ zipline attracts thrill seekers of all ages and is perfect for enhancing your family-friendly entertainment offerings.

The Fly Wire™ zipline uses the safest, proprietary decelerator on the market, The Decelinator™. Awarded best technology applied by the amusement industry, this product has been used by resorts, theme parks and entertainment centers worldwide. Specifically designed to slow down the zip liner without sacrificing the length of the zipline, riders slow down at the very end of the ride, providing maximum thrills.

Ease of set up, half the operators, standard lengths of 500 feet or longer lengths available, the Fly Wire™ zipline is the safest, most thrilling choice on the market for adventure enthusiasts.

Yes, you can zipline through waterparks, resorts, football fields and amusement parks with our Fly Wire™ zipline, the only awarded Best Major Theme Park zipline on the market.

Custom Length Available Upon Request

WHY CHOOSE US?

Over 20 years in business, 5,000 customers worldwide and 9 industry awards. We are the leaders in adventure products™!

- ✓ Engineering at its best. All products exceed ASTM and CE standards.
- ✓ Quality and Safety comes naturally, Fun is our business®.
- ✓ We work with the big guys. Our client lineup speaks for itself.

OUR FEATURES ARE FOCUSED ON YOU

We work closely with leaders in our industry to provide solutions that really work. The Fly Wire™ zipline is the future in family-friendly entertainment. Here's the dish:

DECELINATOR™

The Decelinator™, awarded on technology, is a proprietary device that fully lowers zip-liners and everyday superheroes safely to the ground. The hydraulically activated Decelinator™ raises up in the air, keeping zip liners safely off the landing area. Once the zip line trolley descends into a "Power Pack", a variable rate shock, the zip-liners are safely slowed down at the end of each ride. When the zip liners are stopped, they are hydraulically lowered safely to the landing area.

SPIRAL STAIRCASE

A spiral staircase leads to a zipline tower, which allows two riders at the same time on two lines. This zipline configuration is the safest and fastest in the world, requiring no additional anchoring or attachments.

MOBILE VERSION AVAILABLE

Industry's most popular and longest mobile zipline on the market. Set up in just 45 minutes and zipline up to a football field length (300 feet)!

The Fly Wire™ zipline exceeds ASTM, CE and other industry standards.
